

# LOUD LLAMAS

Marketing Setup. Done Once. Done Right.  
Project Brief | April 2026

## What Is Loud Llamas?

Loud Llamas is a sprint-based marketing setup storefront. Customers pick a marketing channel, choose a package tier, pay, fill out an intake form, and receive a fully configured marketing setup in 5–7 business days. No retainers. No calls. No subscriptions. A sister company to Thayer Systems.

### Brand

| Token        | Value   |
|--------------|---------|
| Primary Blue | #2563EB |
| Dark         | #1F2937 |
| Gray         | #6B7280 |
| Light Gray   | #F3F4F6 |
| Mid Gray     | #E5E7EB |
| White        | #FFFFFF |

Voice: Confident, playful, zero corporate fluff. Short sentences. Direct. A little cheeky.

Logo: Two laughing llamas facing outward with burst lines. Blue and white. Top left of nav.

## Pricing Packages

| Channel              | Starter | Growth | Pro     |
|----------------------|---------|--------|---------|
| Website Build        | \$499   | \$899  | \$1,499 |
| Email / Lifecycle    | \$249   | \$499  | \$899   |
| Organic Social       | \$249   | \$499  | \$899   |
| SEO / AEO Foundation | \$349   | \$699  | \$1,199 |
| Paid Social Playbook | \$149   | \$299  | \$499   |

|                        |       |       |         |
|------------------------|-------|-------|---------|
| SEM / Google Ads Setup | \$399 | \$799 | \$1,399 |
| Analytics & Tracking   | \$199 | \$399 | \$699   |

### Tiers

| Tier    | Users   | Scope                                                     |
|---------|---------|-----------------------------------------------------------|
| Starter | 1       | Single use case, template-based, minimal integrations     |
| Growth  | 2–3     | Multiple use cases, basic automations, light integrations |
| Pro     | Up to 5 | Full feature setup, advanced config, integrations         |

### Add-Ons

| Add-On                      | Price                                 |
|-----------------------------|---------------------------------------|
| Automation Upgrade          | +\$499 per channel                    |
| Rush Delivery               | +\$299 (3 days instead of 5–7)        |
| Paid Social Playbook Bundle | +\$99 when added to any setup package |
| Troubleshooting / Break Fix | \$79 per incident                     |

#### ■■ Honest Talk About Paid Social

Meta makes it nearly impossible for third parties to configure ad accounts on behalf of clients. We're not going to pretend otherwise. So instead of a half-baked setup, we built something better: The Paid Social Playbook. Years of paid social experience packaged into a step-by-step implementation guide. You execute. We built the roadmap. Bundle it with any setup package for \$99.

# Ideal Customer Profile

## Who They Are

Small business owners and founders, 1–20 employees. They have budget (\$250–\$1,500) and marketing intent but not the time, skill, or patience to configure it themselves. They've probably tried a generic agency, had a bad experience, and are now skeptical of retainers. They want to own the thing, not rent access to it.

## What They've Tried

They've Googled it. Maybe hired a freelancer who disappeared. Maybe tried a \$99/month tool that didn't work out of the box. They know what they want to accomplish but can't figure out how to make the tech do it.

## What They're Afraid Of

Wasting money again. Being locked into a contract. Not understanding what they're paying for. The setup working for a month and then dying.

## What They Want

A clean setup. Clear documentation. To hand it to their team or run it themselves. To feel like a real business when it comes to marketing. No dependency.

## Where They Hang Out

LinkedIn (B2B). Reddit (r/entrepreneur, r/smallbusiness). Facebook Groups. Referrals from other business owners. Google Search when they hit a specific problem.

## Best Channels to Reach Them

SEO targeting setup/how-to queries. LinkedIn ads. Referral from Thayer Systems clients. Content marketing around "how to set up [X] for small business."

# Tech Stack

| Tool                    | Purpose                   |
|-------------------------|---------------------------|
| Next.js 14 (App Router) | Framework                 |
| Tailwind CSS            | Styling                   |
| Supabase                | Database + Auth           |
| Stripe                  | Payments                  |
| Resend                  | Transactional email       |
| n8n                     | Order fulfillment webhook |
| Vercel                  | Hosting                   |
| GitHub                  | Version control           |

Net new cost to start: \$0. All tools already under the Thayer Systems umbrella.

## Site Architecture

| Route                   | Purpose                                     |
|-------------------------|---------------------------------------------|
| /                       | Homepage                                    |
| /packages               | Full package menu, all 7 channels x 3 tiers |
| /configure/[channel]    | Dynamic configurator per channel            |
| /checkout               | Stripe checkout + order summary             |
| /intake/[orderId]       | Post-purchase intake form                   |
| /confirmation/[orderId] | Delivery date + deliverables checklist      |
| /support                | Contact form, routes to email               |

## Channel Access Policy

| Channel              | Access Model                                                         |
|----------------------|----------------------------------------------------------------------|
| Website Build        | Client provides CMS/hosting login or we build fresh                  |
| Email / Lifecycle    | Client invites via platform admin role                               |
| Organic Social       | Client invites as admin (LinkedIn Pages / TikTok Business)           |
| SEO / AEO Foundation | Read-only GSC access + CMS access                                    |
| Paid Social Playbook | No access required — playbook delivery only                          |
| SEM / Google Ads     | Client creates MCC link (may trigger Google ID verification 24–48hr) |
| Analytics & Tracking | Client adds GA4 user via email invite                                |

# Database Schema (Supabase)

## orders

| Column                | Type       | Notes                            |
|-----------------------|------------|----------------------------------|
| id                    | uuid       | Primary key, auto-generated      |
| channel               | text       | e.g. email, seo, paid-social     |
| tier                  | text       | starter / growth / pro           |
| price                 | integer    | In cents                         |
| add_ons               | jsonb      | Array of add-on keys             |
| stripe_session_id     | text       | Stripe session reference         |
| stripe_payment_status | text       | pending / paid / failed          |
| delivery_days         | integer    | Default 7                        |
| status                | text       | pending → paid → intake_complete |
| customer_email        | text       |                                  |
| customer_name         | text       |                                  |
| created_at            | timestampz | Auto                             |
| updated_at            | timestampz | Auto                             |

## intake\_answers

| Column        | Type       | Notes                       |
|---------------|------------|-----------------------------|
| id            | uuid       | Primary key                 |
| order_id      | uuid       | FK → orders.id              |
| question_key  | text       | e.g. platform, budget, goal |
| answer        | text       | Customer answer             |
| llamas_decide | boolean    | True if deferred to us      |
| is_critical   | boolean    | Marks required fields       |
| created_at    | timestampz | Auto                        |

## files

| Column    | Type | Notes             |
|-----------|------|-------------------|
| id        | uuid | Primary key       |
| order_id  | uuid | FK → orders.id    |
| file_name | text | Original filename |

|            |            |                      |
|------------|------------|----------------------|
| file_url   | text       | Supabase Storage URL |
| file_type  | text       | MIME type            |
| created_at | timestampz | Auto                 |

# Configurator Question Sets

All 7 channels have their own question set. Critical questions get a "Let The Llamas Decide" toggle. Multiple choice renders as button grid. Multi-select as checkbox grid.

## Website Build

| Question                  | Input Type                                    | Critical |
|---------------------------|-----------------------------------------------|----------|
| Existing site to replace? | Yes / No                                      | YES      |
| Primary goal              | leads / sales / portfolio / info              | YES      |
| Number of pages           | 1–3 / 4–6 / 7–10 / 10+                        | YES      |
| Copy written?             | Yes / No / Let The Llamas Decide              | YES      |
| Brand assets?             | Yes / No / Let The Llamas Decide              | YES      |
| Domain?                   | Yes / No                                      | NO       |
| Platform preference       | Next.js / Webflow / WordPress / No preference | NO       |
| Target customer           | Text                                          | YES      |

## Email / Lifecycle

| Question              | Input Type                                           | Critical |
|-----------------------|------------------------------------------------------|----------|
| Email platform        | Klaviyo / Mailchimp / ActiveCampaign / None / Other  | YES      |
| Primary goal          | welcome series / cart recovery / nurture / retention | YES      |
| Contact list size     | 0–1k / 1k–10k / 10k+                                 | YES      |
| Products or services? | Products / Services / Both                           | YES      |
| Brand assets?         | Yes / No / Let The Llamas Decide                     | YES      |
| Current open rate     | Text (optional)                                      | NO       |
| Target customer       | Text                                                 | YES      |

## Organic Social

| Question           | Input Type                                                             | Critical |
|--------------------|------------------------------------------------------------------------|----------|
| Platforms          | Multi-select: Instagram / LinkedIn / TikTok / Facebook / X / Pinterest | YES      |
| Goal               | brand awareness / leads / community / traffic                          | YES      |
| Post frequency     | daily / 3–5x week / 1–2x week                                          | YES      |
| Brand assets?      | Yes / No / Let The Llamas Decide                                       | YES      |
| Existing accounts? | Yes / No                                                               | NO       |
| Content type       | educational / behind-the-scenes / promotional / entertainment          | NO       |
| Target customer    | Text                                                                   | YES      |

## SEO / AEO Foundation

| Question             | Input Type                                   | Critical |
|----------------------|----------------------------------------------|----------|
| Existing site?       | Yes / No                                     | YES      |
| Primary keyword goal | Text                                         | YES      |
| Done SEO before?     | Yes / No / Not Sure                          | NO       |
| GSC set up?          | Yes / No                                     | YES      |
| GA4 set up?          | Yes / No                                     | YES      |
| Primary content type | blog / product pages / service pages / local | YES      |
| Target customer      | Text                                         | YES      |

## Paid Social Playbook

| Question                 | Input Type                                         | Critical |
|--------------------------|----------------------------------------------------|----------|
| Platforms                | Multi-select: Meta / TikTok / LinkedIn / Pinterest | YES      |
| Monthly ad budget        | under \$500 / \$500–2,000 / \$2,000+               | YES      |
| Campaign objective       | awareness / leads / purchases / traffic            | YES      |
| Creative assets?         | Yes / No / Let The Llamas Decide                   | NO       |
| Target audience          | Text                                               | NO       |
| Landing page?            | Yes / No                                           | YES      |
| Industry / business type | Multiple choice                                    | YES      |
| Competitor brands        | Text                                               | NO       |

## SEM / Google Ads

| Question                     | Input Type                           | Critical |
|------------------------------|--------------------------------------|----------|
| Existing Google Ads account? | Yes / No                             | YES      |
| Monthly ad budget            | under \$500 / \$500–2,000 / \$2,000+ | YES      |
| Campaign type                | search / shopping / display / all    | YES      |
| Conversion tracking set up?  | Yes / No / Not Sure                  | YES      |
| Landing page?                | Yes / No                             | YES      |
| Top keywords/products        | Text                                 | YES      |
| Target customer              | Text                                 | YES      |

## Analytics & Tracking

| Question              | Input Type                                                      | Critical |
|-----------------------|-----------------------------------------------------------------|----------|
| Platforms to track    | Multi-select: GA4 / Meta Pixel / Google Ads / TikTok / LinkedIn | YES      |
| GTM set up?           | Yes / No                                                        | YES      |
| Key conversion events | Text                                                            | YES      |
| Existing site?        | Yes / No                                                        | YES      |
| CMS / platform        | WordPress / Webflow / Shopify / Next.js / Other                 | YES      |
| Running paid ads?     | Yes / No                                                        | NO       |

## FAQ Copy

**Q: Do I need to know exactly what I want?**

A: Not really. That's what the configurator is for. If you're stuck, check the box. Let The Llamas Decide. You can update it later.

**Q: How long does it take?**

A: 5–7 business days standard. 3 days if you add rush at checkout.

**Q: What if something breaks after handoff?**

A: Flat \$79 troubleshooting fee. No drama.

**Q: Do you offer ongoing management?**

A: No. But we can refer you to someone who does.

**Q: What platforms do you use?**

A: We recommend the best tool for your budget and situation. Every recommendation comes with affiliate pricing where available, which helps keep our setup fees low.

**Q: Can I buy more than one package?**

A: Oh, we hope you do. It helps feed the llamas. Each one is its own sprint. Mix and match.

**Q: Why is Paid Social a playbook instead of a setup?**

A: Because Meta makes it nearly impossible for third parties to properly access and configure ad accounts on behalf of clients. Rather than promise something we cannot cleanly deliver, we built a better product. The playbook gives you everything you need to launch it yourself.

## Build Order

| Step | Task                    | Details                                                       |
|------|-------------------------|---------------------------------------------------------------|
| 1    | Project scaffold        | Next.js 14, Tailwind, ESLint, TypeScript                      |
| 2    | Environment variables   | .env.local template with all keys                             |
| 3    | Supabase setup          | Client, server, schema migrations, RLS policies               |
| 4    | Stripe setup            | Products script (21 products + 3 add-ons), webhook handler    |
| 5    | Resend email setup      | order-confirmation, intake-complete, support-reply            |
| 6    | Homepage (/)            | Full copy from CLAUDE.md, on-brand design                     |
| 7    | /packages               | All 7 channels, 3 tiers each, add-on cards                    |
| 8    | /configure/[channel]    | Dynamic configurator, all 7 channel question sets             |
| 9    | /checkout               | Stripe Elements, order summary, dynamic add-on toggles        |
| 10   | /intake/[orderId]       | Channel-specific intake, file uploads, progress save          |
| 11   | /confirmation/[orderId] | Delivery date, deliverables checklist                         |
| 12   | /support                | Contact form, auto-reply, fulfillment team forward            |
| 13   | n8n integration         | Webhook fires on checkout.session.completed                   |
| 14   | End-to-end test         | Full flow: homepage → configure → checkout → intake → confirm |
